Okay, so 'yes' to your first question (this is the p-CBSA study that our friends from CalEPA sent us recently), and 'not sure' on the second question. I think it prudent to maybe wait until we speak with CalEPA next week before we commit (or not) to sending to Janet. It doesn't seem like a big deal but you never know.

Jason,

Do we have this and if so, am I allowed to give this to Janet? Thanks.

Hi Teresa!

I am having a difficult time finding an original full publication of a study that EPA commissioned from American Biogenic Corp in 1985. I know that you guys have not done the assessment on this chemical, but have reviewed OEHHA's assessment (in April of 2015). And given that it was work commissioned by the EPA, I thought I would ask...

Is there any way you guys have, and could send a copy of this article (all I need is the manuscript, nothing else):

**American Biogenics Corporation (1985). Twenty-eight day oral (gavage) toxicity study in albino rats using A-100 (4- Chlorobenzenesulfonic acid). Decatur, IL.**

Do I need a more formal and official request? Like a FOIA or something? (groan) Or do you have any advice on where I might find it?

Thanks for any help you can give!

Hope everything is going well with you. Miss you guys,

*Janet*
